

MDVLCraft skill trees

Version 1.9.12. Every bonus, spell, technique and Epic Fight skill in each archetype tree, added up over the **whole** tree. Players pick 2 archetypes; each tree gives 1 point to start and 1 per level, with no level cap. Percentages add to the base; Max Health is in half-hearts. Spells and techniques go on the ability wheel; Epic Fight skills are equipped in the Combat Skills box of the abilities screen.

Class bonuses

Every archetype of a class has all of its class's bonuses below (whole-tree totals). Every archetype also has the core bonuses (health, speed, mana and so on); both are included in each archetype's totals.

Class	Shared by every archetype of the class
Warrior	–

Everyone

Every player knows Guard, Parrying, Parry – Absolute Deflection and the souls-like dodge and step (in place of Roll and Step), and starts with the souls-like dodge equipped. Assassin, Phantom, Scout and Thief also teach Precise Parry when picked in the Classes tab. Epic Fight skills never need another skill learned first.

On first joining, players also pick a race (Origins: Human, Feline, Merling, Arachnae, Dwarf, Wood Elf, Hobgoblin, Siren, Half-Ogre, Sharkfolk, Kirin, Saurusfolk, Ratfolk, Shadow or Sporeling, all at normal player size) and a class (Origins: Classes). Races and classes are separate from the archetype trees.

Knight Warrior

An armoured wall. Knights soak up hits with damage and projectile resistance, armour toughness and stun armour, and hit back with greatswords. Shield and Fortify let them shrug off fights other classes would run from, Lingerin Strain leaves a weakening cloud behind, Gravity Stomp slams the ground around them, Impact Guard blocks almost anything, Endurance keeps them swinging through hits, Magic Immunity shrugs off spells, Auto Heal turns mana into health, Pain Anticipation braces for the next blow, Shield Counter turns a block into a stun and Combat Mastery weaves dodges into attacks. 434 skills, 497 points to unlock everything.

Samurai Warrior

A disciplined duellist who lives on timing, with no spells at all. Every katana strike hits harder and cuts through armour, every perfect parry refills stamina and reflects damage, and heavy impacts stagger enemies. A Stance channels fire, wind, water or earth (water lengthens the parry window), Blitz and Surprise Attack strike out of nowhere, and Technician, Strength I, Revelation, Manipulator and Parry Master reward perfect timing. Dancing Blade, Dopamine, Swordmaster, Hasty Casting, Spider Techniques and Combat Mastery round out a restless fighting style, and at the very end of a path waits Myriad Blades Convergence. 402 skills, 470 points to unlock everything.

Cursed Ranger

Cursed techniques fuelled by mana instead of cursed energy, each with its own cooldown. Dismantle and Cleave cut enemies apart, and the Malevolent Shrine domain, closed and then open, shreds everything around you while you keep cutting. Cursed Control makes techniques cheaper and Wither Skull hurls death from afar; melee resistance and toughness shred round it out, with Swordmaster and Death Harvest for the blade, Vengeance against whoever hurt you, Devour to feed on the fallen and Paralyzing Skreech to shred armour with pulses of sound.

363 skills, 423 points to unlock everything.
